Construction Impact Notification Belleville Terminal Redevelopment

We are pleased to share that construction of the Belleville Terminal Redevelopment Project is progressing.

Starting this week, crews will begin the installation of a silt curtain within the water, located inside the delineated project site boundary. This curtain is an important environmental protection measure designed to contain sediment and minimize cloudiness during in-water construction activities.

The silt curtain will be installed by marine crews using specialized equipment and will remain in place for the duration of in-water works. The silt curtain map, shown in red in the attached photo, outlines the location of the curtain within the project site.

What to Expect

Timing

- August 20-22, 2025.

Hours of Work

- 7 A.M. to 5 P.M.

Traffic

- N/A.

Impacts

- Visual changes in the water due to the presence of the silt curtain.

Thank you for your patience and understanding while we complete this important work.
